

## **Course Description:**

This course is a 192-hour state approved training program, which is based on the National EMS Education Standards. Applicants may apply for state certification after becoming a Nationally Registered EMT. At the successful completion of this training program and required testing, the entry level EMT will be able to: evaluate the patient's condition, either medical or trauma, and provide the appropriate assessment-based treatment, which includes patient packaging and handling designed to minimize patient discomfort and prevent further injury. EMTs are trained in the use of AEDs and the multi-lumen airway.

## **Prerequisites:**

In order for a participant to be accepted in this specialized course he/she must fulfill the following:

1. Must be 16 years of age. (Note: Applicant must be 18 to test for NREMT)
2. Must provide immunization status with documentation of Hepatitis B immunization or declination form stating refusal to take immunization
3. T.B. testing within last 6 months.
4. Free from communicable disease.
5. Must complete a federal background check performed by state police.
6. May not have physical or psychological dependence to any substance other than those recognized as therapeutic treatments for valid medical conditions for which they are currently under the care of a physician.
7. May not be enrolled in any EMT training program if he/she has been dismissed from any other EMS training program for reasons other than academic failure within two years prior to the start of the current program.
8. Proof of health insurance is required.

**Hours:** 192

**Cost:** \$1500
